WHAT WE DO

01

AC repair

Diagnose and fix the same day. Most of the time — particularly if it's not on the clock.

02

Furnace repair

From a dead pilot light to cracked heat exchangers, we'll fix what's broken before we get there.

03

Installation

Put any new equipment in so that you're not stuck with what actually works.

04

Maintenance plans

Two visits a year to catch the failure before it happens in January.

05

Emergency service

24/7 dispatch. No emergency calls in Elmhurst. Or anywhere else we're on call.

NO SUBCONTRACTORS

Our own trucks. Our own techs.

Every job on this site is done by a skilled technician. No subcontractors. No dispatching strangers. Same focus, same trucks, same reliability for eleven years.

What Belmont Cragin says

\*\*\*\*\* - NABIGU, BATHINGUBET

Furnace died on the coldest night of the year. Tech was here in under an hour and had heat back on before midnight. Fair price, no sweat.

\*\*\*\*\* - TOWEL, OGBI

Replaced our AC unit before summer hit. Clean install, walked us through the new thermostat, showed us what they do.

\*\*\*\*\* - JEFFREY, HERTOG

Been on their maintenance plan for 10 years. They call when it's time for a check instead of this other company.

WHERE WE WORK

Serving Belmont Cragin and the surrounding neighborhoods

Belmont Cragin | Dearborn | Evanston | Highland Park | Oak Park | Riverdale

### The Lakeside Comfort Plan

Two furnace calls a year, priority scheduling ahead of one-time calls, 15% off any repair and two wintered hours — nights, weekends, holidays included.

[Join the plan](#)

- ✓ Spring & fall furnace includes
- ✓ Priority same-day scheduling
- ✓ 15% off all repairs
- ✓ No overtime emergency fees

KNOW THE WARNING SIGNS

### 4 furnace problems worth a call

**No heat**  
No heat in any rooms or the furnace unit starts up and stops.

**Strange noises**  
Strange sounds or a rattling or banging usually means a lack of full gas.

**Thermostat problems**  
Set it up correctly or call us if the thermostat doesn't respond or if it's off.

**Poor air flow**  
Weak air means uneven temperatures or a system that's not working.
